PROFESSIONAL SUMMARY

I'm a final year Bachelor of Computing student seeking an internship or graduate software development role. I have hands-on experience building full-stack web and desktop applications across university, personal and freelance projects.

EDUCATION

Hoërskool Garsfontein
National Senior Certificate
Average: 80.57% | 4 Distinctions

Pretoria
Graduation Date: 2022

Belgium Campus
Bachelor of Computing
Current weighted average: 81% | Distinctions in 34 of 36 modules

Pretoria
Expected Graduation Date: 2027

TECHNICAL SKILLS

Languages: C#, JavaScript, Python, SQL

Frameworks & Technologies: .NET Framework, Node.js (Express.js), HTML5, CSS3

Databases: Microsoft SQL Server, MongoDB

Tools: Git, GitHub, Linux (Basic Terminal Commands)

Developing Proficiency In: Next.js, React, TypeScript, Tailwind CSS, Java and PostgreSQL

Interests: I enjoy breaking down problems to fully understand their root cause, then designing and building practical solutions, often in the form of web applications or small tools. Outside of development, I'm often on the golf course or at the driving range.

UNIVERSITY PROJECTS

Sign Speak AI (<https://waldo-blom.github.io/PRJ381/>)

Apr 2025 - Oct 2025

- Collaborated in a team of 14 to build a web-based application that translates sign language gestures into text and real-time speech, using a custom CNN + LSTM model.
- Built with Node.js, Express, Python (Flask), PyTorch, MediaPipe, MongoDB, WebSockets, WebRTC, JavaScript, Canvas, and pytsx3.
- Responsible for connecting the AI model's predictions to the front end using WebSockets and WebRTC for real-time streaming, and for building several front-end components.

Sky High - Superhero Management System (<https://tinyurl.com/PRG282SkyHigh>)

Oct 2025 - Oct 2025

- Developed a C# application for managing superhero records. Built using C# Windows Forms and a file-based database.
- Led the project team, overseeing planning and design while enforcing proper Git version control practices, resulting in a well-managed project that achieved a final mark of 100%.

PERSONAL PROJECTS

Portfolio Website (<https://waldoblom.com>)

2025 – Present

- Developed a personal portfolio website showcasing my projects and technical skills.
- Built using HTML5, CSS3, and JavaScript, with the FormSubmit API integrated for handling contact form submissions.

FREELANCE PROJECTS

RangeMaster (<https://tinyurl.com/RangeMasterV1>)

Dec 2025 - Feb 2026

- The application was commissioned by my golf coach as a tool for golfers to track and score aspects of their game, storing data over time to help identify performance trends and highlight areas to improve. It currently has 43 active users.
- Built with Next.js, React, TypeScript, and Tailwind CSS, with Firebase Authentication and Firestore for the backend. Developed in Firebase Studio, with the integrated Gemini coding assistant used during certain aspects of development.
- Turned my coach's initial prototype into a production-ready application by designing and implementing the backend functionality to enable data storage and retrieval.
